

PROGRAM GOALS

TECHNOLOGY EDUCATION

1. The student is able to read, write, communicate orally, and compute as required in the workplace.
2. The student is able to perform basic job skills within a chosen vocational field.
3. The student values working with others.
4. The student values interpersonal skills (negotiation, teamwork) as a way to accomplish work tasks.
5. The student values keeping up-to-date, learning new things appropriate to a changing working environment.
6. The student values the global economy and cultural diversity.
7. The student knows how technological literacy affects personal and career success.
8. The student is able to think creatively and solve problems in individual and group settings.
9. The student is able to demonstrate successful personal management skills in the workplace.
